Lengthening with option for articulation to maximise mobility
Lengthening with option for articulation to maximise mobility

Three screw seats
accommodating either 2 mm threaded wires or 3 mm bone screws

Threaded screw for compression and/or distraction 360° turn clockwise/anticlockwise for 1 mm distraction/compression respectively

Optional T-clamp attachment
for insertion of screws close to the joint at right angles to the longitudinal axis

Articulation in horizontal or vertical axis

M111 for movement at 90 degrees to the plane of the bone screws: for joint stiffness, comminuted intra-articular fractures

M122 for movement in the angulation plane of the bone screws: for soft tissue correction (e.g., cerebral palsy), arthrodesis of the 1 carpo-metacarpal joint following soft tissue correction
